

EN - Safety instructions - Installation instructions

**Kanali 19 Dark**

- 1- Installation and commissioning may only be carried out by authorized specialists. Electrical components must be connected by qualified electrician.
- 2- BEWARE! Make sure the luminaries are always disconnected from the mains supply during wiring, installation and maintenance work. Before starting the installation, make sure the power is switched off.
- 3- This fixture is suitable for indoor wall/ceiling or for cove lighting use. The luminaire is exclusively used for lighting and is to be installed in accordance with the national regulations. Any other use or installation is regarded as "non according to instructions".
- 4- The luminaire with F mark are suitable for installation on normally flammable surfaces (for example wood and wood-based materials of more than 2 mm thickness).
- 5- Do not put the luminaire on surfaces that are wet, recently painted or on electrical connections.
- 6- Always be sure to keep a minimum spacing of more than 0.5m (50cm) between the luminaire and the illuminated surface.
- 7- Do not cover the luminaire. Do not hang anything from the luminaire.
- 8- Ceiling installation.

Check the code and cut the plasterboard ceiling according to dimensions of the table below.

Remove, gently from luminaire the diffuser and then the mirror.

Connect the ceiling power cable supply with terminal block according to indications.

Tilt and pass the luminaire through the hole and place it parallel to the ground, so the side linear holders should be attached to the upper part of plasterboard.

Place gently back the mirror of the luminaire.

Place the lamps and then the diffuser of the luminaire.

For better results in support place two more screws near to luminaire where the mechanical parts are connected to ceiling.

Finish the imperfections in ceiling using stucco.

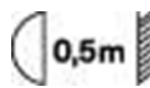

Code	4510	4511	4512	4513
Cut/Out Dimensions mm	171 x 2000	171 x 1000	171 x 600	171 x 400

- 9- Cleaning is limited to the external parts of the luminaire. Do not clean under high pressure.

**Protection class I.** The ground cable (green/yellow) must be connected. If there is not a mains supply with a protective ground wire available, the product must not be connected/used there
